

Description of the product:

- ABS white material
- Wall Mounted
- Safety lock
- Tank capacity: 1'1 liters
- Net weight of the product: 0.85Kg

Technical Specifications:

Dispenser made entirely of ABS material, white, receives inside a polyethylene tank with a liquid soap filling capacity of 1.1 liters. The inner tank is filled by opening the housing by means of a safety lock located on the upper part of the product. In its front it has a viewer for soap filling control. The soap dispenser housing is made of white finished ABS thermoplastic material. The activation of the dispenser is done by placing the hands in the field of action of the photocell and stops automatically once the soap has been dosed. The automatic dispensing system is powered by four AA-LR06 batteries, with a voltage of 1.5V. The dimensions of the product are 235x140x107mm, being the net weight of it of 0.85Kg. The installation of the same one is done attached to the wall by means of 4 screws with universal brick wall wall plug, each of them located on the mounting bracket of the dispenser. Supports vegetable or synthetic soap. The model of soap dispenser is AUTOMATIC 04008.
