## Safety Data Sheet

### SECTION 1. Identification of the substance/mixture and the company/undertaking

#### 1.1. Product identifier

Code: M3  
Name: M3

#### 1.2. Relevant identified uses of the substance or mixture and uses advised against

Description/ use Sanitising detergent

#### 1.3. Details of the supplier of the safety data sheet

Name: MDM s.r.l.  
Address: via Prima strada 9  
Town/ city and nation: 35026 Conselve (PD)  
ITALY  
tel. 049 5310317  
fax 049 9599029

#### 1.4. Emergency telephone number

049 5310317 Mon - Fri 9.00 a.m. – 6.00 p.m.

For urgent information contact: E-mail info@emmediemme.biz  
POISONS CENTRE: see point 16 of this data sheet

### SECTION 2. Hazards identification.

#### 2.1. Classification of the substance or mixture.

The product is classified as hazardous pursuant to the provisions set forth in (EC) Regulation 1272/2008 (CLP) (and subsequent amendments). It therefore requires a data sheet that complies with the provisions set forth in (EC) Regulation 1907/2006 and subsequent amendments. Any additional information concerning the risks for health and the environment are provided in sections 11 and 12 of this data sheet.

##### 2.1.1. Regulation 1272/2008 (CLP) and subsequent amendments.

#### Hazard classification and indications:

Skin Irrit. 2 H315 Causes skin irritation.  
Eye Dam. 1 H318 Causes serious eye injuries.

##### 2.1.2. Directive 67/548/EEC and 1999/45/EC and subsequent amendments.

Hazard symbols: Xi

R phrases: 36

The full wording of the risk (R) phrases and hazard (H) statements is provided in section 16 of this data sheet.

#### 2.2. Label elements.

Hazard labelling pursuant to (EC) Regulation 1272/2008 (CLP) and subsequent amendments.

H315 Causes skin irritation.  
H318 Causes serious eye injuries.

P260 Do not breathe dust/fumes/gas/mist/vapours/spray.  
P280 Wear protective gloves/ protective clothing/ eye protection/ face protection.  
P310 Immediately call a POISON CENTRE or doctor.

MDM s.r.l.

P301 + P330 + P331  
P303 + P361 + P353  
P305 + P351 + P338

IF SWALLOWED: rinse out the mouth. Do NOT induce vomiting.  
CONTACT WITH THE SKIN (or hair): take off immediately all contaminated clothes  
Rinse skin with water/shower.  
CONTACT WITH THE EYES: Rinse the eyes thoroughly for several minutes. Remove contact lenses if present and easy to do. Continue rinsing.

2.3. Other hazards.

Information not available.

### SECTION 3. Composition/information on ingredients.

3.2. Mixtures.

Contains:

Identification	Conc. %.	Classification under 67/548/EEC.		Classification under 1272/2008 (CLP).	
UNDECANOL, RAMIFIED AND LINEAR, ETHOXYLATE, PROPOXYLATE CAS No. 68154-97-2 REACH No. N/A because it is a polymer	1 ≤ C < 5	Xi	R41	Eye Dam 1	H318
BENZALKONIUM CHLORIDE CAS No. 68424-85-1 EINECS No. 270-325-2 REACH No. 01-2119945987-15	1 ≤ C < 5	C N Xn	R34 R50 R21/22	Skin Corr. 1B Aquatic Acute 1 Acute Tox. 4 Acute Tox. 4	H314 H400 H302 H312

The full wording of the risk (R) phrases and hazard (H) statements is provided in section 16 of this data sheet.

### SECTION 4. First aid measures.

4.1. Description of first aid measures.

No special measures required. However, rules of good industrial hygiene should be observed.

EYES: wash immediately and thoroughly with water for at least 15 minutes. Seek medical advice.

SKIN: wash with plenty of soap and water. Remove contaminated clothing. If irritation persists, seek medical advice. Wash contaminated clothing before reuse.

INHALATION: take the subject out into the open air. If breathing is hampered, consult a doctor.

INGESTION: consult a doctor. Induce vomiting only if instructed to do so by a doctor. Do not administer anything by mouth if the subject is unconscious and unless authorised to do so by a doctor.

4.2. Most important symptoms and effects, both acute and delayed.

Burning and irritation of the skin and mucous membranes.

For the symptoms and affects caused by the substances contained in the product see section 11.

4.3. Indication of any immediate medical attention and special treatment needed.

Follow medical advice.

### SECTION 5. Firefighting measures.

The product is neither flammable nor combustible. In the event of a fire use extinguishing media suited to the surrounding environment

5.1. Extinguishing media.

SUITABLE EXTINGUISHING MEDIA

The extinguishing media to be used is the conventional kind: carbon dioxide, foam, powder and nebulised water.

UNSUITABLE EXTINGUISHING MEDIA

None in particular.

5.2. Special hazards arising from the substance or mixture.

HAZARDS CAUSED BY EXPOSURE IN THE EVENT OF FIRE

Avoid breathing combustion products.

5.3. Advice for fire-fighters.

MDM s.r.l.

Revision no. 0

Date of revision 25/06/2015

M3

Printed on 25/06/2015

Page no. 3/7

#### GENERAL INFORMATION

Use jets of water to cool the containers to prevent product decomposition and the development of substances potentially hazardous for health. Always wear full fire-prevention gear. Collect extinguishing water to prevent it from draining into the sewer system. Dispose of contaminated water used for extinguishing and the remains of the fire according to applicable regulations.

#### EQUIPMENT

Normal fire-fighting gear, including self-contained, open-circuit, compressed-air breathing apparatus (EN 137), flameproof suit (EN 469), flameproof gloves (EN659) and firefighter boots (HO A29 or A30).

### SECTION 6. Accidental release measures.

#### 6.1. Personal precautions, protective equipment and emergency procedures.

##### 6.1.1 For non-emergency personnel:

Move away and wait until emergency personnel have made the area in which the release took place safe.

##### 6.1.2 For emergency responders:

Wear suitable protective equipment (including personal protective equipment as indicated in section 8 of this safety data sheet) in order to avoid contaminating the skin, eyes and personal clothing. Use breathing apparatus in the presence of airborne vapours or dust. These instructions apply to both processing staff and emergency responders.

#### 6.2. Environmental precautions.

The product must not enter the sewer system, surface water or ground water.

#### 6.3. Methods and materials for containment and cleaning up:

Confine using earth or inert material. Collect as much material as possible and eliminate the rest using jets of water. Contaminated material should be disposed of in compliance with the provisions indicated under point 13.

#### 6.4. Reference to other sections.

Any information concerning individual protection and disposal is provided in sections 8 and 13.

### SECTION 7. Handling and storage.

#### 7.1. Precautions for safe handling.

Avoid contact with the eyes and skin. Do not inhale vapours.

Do not handle the product before consulting all the other sections of this safety data sheet. Avoid dispersion of the product into the environment. Do not eat, drink or smoke during use.

#### 7.2. Conditions for safe storage, including any incompatibilities.

Store the product in clearly labelled containers. Store containers away from any incompatible material, having consulted section 10.

#### 7.3. Specific end uses.

Information not available.

### SECTION 8. Exposure controls/ personal protection.

#### 8.1. Control parameters.

None

#### 8.2. Exposure controls.

As the use of adequate technical equipment must always take priority over personal protective equipment, make sure that the workplace is well aired through effective local aspiration. Personal protective equipment must comply with the applicable regulations indicated below.

#### HAND PROTECTION

Protect hands with category III (Directive 89/686/EEC and standard EN374) PVC, neoprene, nitrile or equivalent work gloves. The following should be considered when choosing work glove material: degradation, breakage times and permeation. Work glove resistance to preparations should be checked before use, as it can be unpredictable. The gloves' limit depends on the duration of exposure.

#### EYE PROTECTION

Wear a hood visor or protective visor together with airtight goggles (see standard EN 166).

**SKIN PROTECTION**

Wear overalls with long sleeves and category II (see Directive 89/686/EEC and standard EN 344) professional safety footwear. Wash with soap and water after removing protective clothing.

**BREATHING PROTECTION**

If the threshold value (where available) of one or more of the substances present in the product is exceeded, in terms of daily exposure in the workplace or a fraction established by the company's prevention and protection service, wear a facemask with a type B or universal filter whose class (1, 2 or 3) must be chosen to suit the limit concentration for use (see standard EN 141).

In the absence of technical measures, airway protection equipment, such as masks of the type indicated above, are required to restrict worker exposure. Facemasks only provide limited protection.

In the presence of substances considered to be odourless or whose olfactory threshold exceeds the applicable exposure level and in the case of an emergency, in other words when the exposure levels are unknown or the concentration of oxygen in the workplace is lower than 17% in volume, wear self-contained, open-circuit, compressed-air breathing apparatus (see standard EN 137) or fresh air hose breathing apparatus for use with a full facemask, half mask or mouthpiece assembly (see standard EN 138).

An emergency eye washing and shower system must be provided.

**ENVIRONMENTAL EXPOSURE CONTROLS.**

Check emissions from productive processes, including those from ventilation equipment, to make sure that they meet environmental protection standards.

**SECTION 9. Physical and chemical properties.****9.1. Information on basic physical and chemical properties.**

Physical state	clear liquid
Colour	Colourless
Smell	Characteristic.
Olfactory threshold.	Not available.
pH.	4.5
Melting or freezing point.	<0°C.
Initial boiling point.	>100°C.
Boiling range.	Not available.
Flash point.	> 60 °C.
Evaporation rate	Not available.
Lower flammability limit.	Not flammable.
Upper flammability limit.	Not flammable
Lower explosive limit.	Not explosive
Upper explosive limit.	Not explosive
Vapour pressure.	Not available.
Vapour density	Not available.
Relative density.	1.2 Kg/l
Solubility	Not available.
Partition coefficient: n-octanol/water:	Not available.
Autoignition point.	Not available.
Decomposition temperature.	Not available.
Viscosity	Not available.
Explosive properties	Not explosive.
Oxidising properties	Non-oxidant.

**SECTION 10. Stability and reactivity.****10.1. Reactivity.**

There are no particular hazards of reaction with other substances in normal conditions of use. Avoid contact with strong oxidising agents and bases.

**10.2. Chemical stability.**

The product is stable in normal use and storage conditions.

**10.3. Possibility of hazardous reactions.**

No hazardous reactions are expected in normal use and storage conditions.

**10.4. Conditions to avoid.**

Do not store outdoors for long periods. Protect from overheating and direct exposure to sunlight.

#### 10.5. Incompatible materials.

Strong oxidising agents and strong bases.

#### 10.6. Hazardous decomposition products.

Does not decompose in normal conditions

### SECTION 11. Toxicological information.

#### 11.1. Information on toxicological effects.

In the absence of toxicological data obtained from experiments using the substance in question, any hazards the product poses for health have been evaluated according to the substances it contains, according to the criteria set forth in applicable classification standards. Therefore, consider the concentrations of the individual hazardous substances indicated in section 3, in order to evaluate the toxicological effects deriving from exposure to the product.

The product causes serious eye injuries and can cause corneal opacity, iris damage and irreversible discolouration of the eye.

Acute effects: contact with skin causes irritation with erythema, oedema, dryness and cracking. Inhaling vapours can cause moderate irritation of the upper airways. Swallowing may cause health problems, including abdominal pain with burning, nausea and vomiting.

- a) Acute toxicity: the product is not toxic
  - b) Irritation: the product causes skin irritation and serious eye injuries.
  - c) Corrosion: the product is not corrosive
  - d) Sensitisation: the product is not sensitising
  - e) repeat dose toxicity: data not available
  - f) carcinogenicity: the product is not carcinogenic.
- IARC: No ingredient of this product present at concentrations of 0.1% or higher has been identified as a known or IARC-recognised carcinogenic.
- g) Germ cell mutagenicity: the product is not mutagenic
  - h) Reproductive toxicity: the product is not toxic for the reproductive system

### SECTION 12. Ecological information.

Use in compliance with good manufacturing practice, avoiding dispersion of the product into the environment. Inform the competent authorities if the product enters waterways or the sewer system or if it contaminates soil or vegetation.

#### 12.1. Toxicity.

The product is not hazardous for the environment

#### 12.2. Persistence and degradability.

Information not available.

#### 12.3. Bioaccumulation potential.

Information not available.

#### 12.4. Mobility in soil.

Information not available.

#### 12.5. Results of PBT and vPvB assessment.

On the basis of available data, the product does not contain PBT or vPvB substances in percentages of over 0.1%.

#### 12.6. Other adverse effects.

Information not available.

### SECTION 13. Disposal considerations.

#### 13.1. Waste treatment methods.

Reuse, when possible. As is product residues should be considered special non-hazardous waste.

Disposal must be performed through an authorised waste management firm, in compliance with national and local regulations.

Dispersion of the product in soil, the sewer system or waterways must be avoided at all costs.

#### CONTAMINATED PACKAGING

Contaminated packaging must be recovered or disposed of in compliance with national waste management regulations.

### SECTION 14. Transport information.

The product should not be considered hazardous in compliance with applicable regulations concerning the transport of hazardous goods by road (A.D.R.), rail (RID), sea (IMDG Code) and air (IATA).

### SECTION 15. Regulatory information.

#### 15.1. Safety, health and environmental regulations and legislation specific for the substance or mixture.

**MDM s.r.l.**

Revision no. 0

Date of revision 25/06/2015

**M3**

Printed on 25/06/2015

Page no. 6/7

Substances on the Candidate List (Article 59, REACH). None.  
Substances subject to authorisation (Annex XIV, REACH). None.  
Substances subject to exportation notification obligations (EC) Reg. 649/2012:  
Substances subject to the Rotterdam Convention: None.  
Substances subject to the Stockholm Convention: None.

Hygiene controls. Workers exposed to this chemical agent that is hazardous for health must undergo health vigilance performed pursuant to the provisions set forth in article 41 of Legislative Decree 81 of 9 April 2008 unless the risk for workers' health and safety has been evaluated as negligible pursuant to article 224, subsection 2.

#### 15.2. Chemical safety assessment.

For this mixture a chemical safety assessment is not required. If known, the scenarios of the pure ingredients of the mixture are available subject to request.

### SECTION 16. Other information.

Wording of the hazard (H) statements indicated in sections 2 and 3 of the data sheet:

Acute Tox. 4	Acute toxicity Hazard category 4
Aquatic Acute 1	Hazardous for the aquatic environment – chronic hazard, category 1
Eye Dam. 1	Serious eye damage/irritation Hazard category 1
Skin Corr. 1B	Skin corrosion/irritation Hazard category 1B
H302	Harmful if swallowed.
H312	Harmful in contact with skin.
H314	Causes severe skin burns and eye injuries.
H315	Causes skin irritation.
H318	Causes serious eye injuries.
H400	Very toxic to aquatic life.

Wording of the risk (R) phrases indicated in sections 2 and 3 of the data sheet:

R34	CAUSES BURNS
R41	CAUSES SERIOUS EYE DAMAGE
R50	VERY TOXIC TO AQUATIC LIFE
R 21/22	HARMFUL IN CONTACT WITH SKIN AND IF SWALLOWED
