When It comes To Cleaning, You Can See The Difference With Bayersan.

Bayersan is one of the leading manufacturers of cleaning products in Europe with a name that is synonymous for quality and service – just one of the reasons we have grown our family-run business year-on-year since our foundation in 2000 – and why businesses from all over the world come to us for their cleaning supplies.

Based in Çorlu, Tekirdağ our company specialises in the manufacture and distribution of a full range of professional and industrial cleaning equipment and supplies, suitable for janitorial use, hospital hygiene, workplaces, public cleaning and school hygiene. Our manufacturing facility has a production area of 12000 sqm, and exports our products to 62 countries worldwide, so we're able to deal with the most demanding orders.

Where quality comes first...

At Bayersan, we pride ourselves on listening to our customers and understanding the needs of business. That's why we've designed all own products from the ground up based on client needs and optimised for efficiency. All our cleaning equipment is designed to be ergonomic and reduce costs for businesses.

At the same time, our quality control department ensures nothing leaves the factory unless it meets our rigorous testing standards. Everything we manufacture complies to the highest safety standards, made using only the highest quality raw materials, sourced sustainably and, wherever possible, fully recyclable.

Our high quality product ranges include;

- Outdoor and Indoor Window Cleaning Systems
- Mopping Systems
- Window Cleaning Equipments
- Floor Cleaning Equipments
- Cleaning Bucket Trolleys
- Multi-Purpose Trolleys
- Dust Bins

...And customer service is second-to-none

But it's not just our wide range of quality products that keeps our business customers coming back. It's our service too. Bayersan is committed to providing the highest level of customer service in everything we do. In fact, we will customise our products and the service we deliver to meet the unique needs of each and every one of our customers.

That's because our goal is to give you the best when it comes to cleaning supplies, so you choose Bayersan every time. From the moment you contact us to delivery and aftersales, we guaranteed a prompt, efficient and courteous service, along with quick order processing, fast delivery times and low shipping fees.

SOLAR PANEL CLEANING SYSTEM

SOLAR PANEL CLEANING BRUSH

The main reason is that the absorption rate of solar panels to sunlight will vary with objective factors. If your solar panels have accumulated a lot of dirt such as dust, leaf debris, bird droppings, etc. for a long time, the power you get through this method will be greatly reduced. Every home or organization that uses solar panels should regularly clean the panels to keep the solar power system in top condition.

The double brush head design of the device makes the actual cleaning width reach an astonishing 65cm. According to the current experience of the main users, a single person can clean 500 to 750 square meters of panels per hour when using this tool.

Complete System (Ready To Work);

- 22.2 V and 26Ah Lithium Ion Battery with back pack
- Charging Time : 5 hours
- Working Time: 4-5 hours
- Optional 5.5m and 7.5m Carbon Poles
- Battery Charger
- Brush head and Driver Motor
- 2 x Ø33cm brushes
- Rotate Speed: 300rpm
- 9m water wire + 20m water pipe

SOLAR PANEL ROBOTIC SYSTEM

Under the control of the remote control, the crawler chassis all-terrain operation robot can realize forward, backward, left and right turns, etc., so as to walk in any direction on the solar panel and perform all-round cleaning operations without dead ends.

The electric roller brush washing and dry cleaning dual-purpose robot is equipped with a rotating cleaning roller brush at the front end, and a water nozzle is installed on the upper end of the roller brush. The combination of the two realizes the efficient cleaning of solar panels. 150 meters remote control cleaning. The robot adopts a long-distance wireless remote control method, with a control distance of 150 meters and more flexible use...

Technical Details;

- Lithium battery 2 x 24V.
- Remote Control
- Working Time: 3-4 hours
- Brush Length: 110 cm
- Travel Limit: 11m-12m/min
- Water Consumption: 15-12L / min
- Working Angle: 25
- Rotate Speed: 600rpm
- Cleaning Capacity: 1.2 megawatts / day
