We care about your garden !

Trolla SYSTEM - More than a yard rake

Trolla SYSTEM gives your garden tractor/ATV brand new applications; it makes it possible for you to solve most tasks in your garden.

A beautiful reeved courtyard, fertilizing - even of large areas, easy spraying of ground and trees - with help of the sprayer with fixed boom and lance. Even brooming is possible.

Trolla SYSTEM is as simple as it is brilliant. With 2 splitter you can remove the TS-basic yard rake module and replace it either with one of the optional module or by the carrying plate, which can be used to transport of goods or mounting of some of the optional module.

The yard rake can be adjusted with a spindle. As option the spindle can be replaced with an 12 V electric actuator.

With the optional solution tow ball / pin, there are several new possibilities for what can be tow behind a garden tractor/ATV. It could be a grader or a milling machine - products Trolla also offers.

Trolla SYSTEM is not only practical in use - it is also designed so it takes up less space when not in use. Safety and quality are important for us at Trolla, Trolla SYSTEM product are CE approved.

Trolla have different shop solutions that present the products in the best way.
